 Predict Default Risk

Loan Default Risk Predictor

Machine-learning powered applicant risk assessment using a tuned **XGBoost** model.

>  Auto-Computed Derived Features

Prediction Summary

Default Probab...	Risk Category	Credit Score	Loan-to-Income
81.8%	 Hi...	700	1.05×

A curved bar chart with a red center and green/yellow outer bands, labeled with 0, 20, 40, and D€.

Recommendations

-  Manual review required — high default risk
-  High debt-to-income — consider reducing loan amount

Risk Factors

 High debt-to-income (47%)
